

FEATURES [Print](#)

Quick and Flexible System

GU60A is a universal, fully motorized system that enables rapid movement. Its unique U-arm rotates +120° to -30°, and the Source to Image Distance (SID) travels 100 cm to 180 cm (39.37 in. to 70.86 in.) to enable examination in various positions with a remote control.

Rotation-type Smart Stitching

Smart Stitching captures two or more images consecutively, and then stitches the multiple images into one image.

Results may vary depending on individual use.

Option Compatible Samsung DR systems may vary by country.

S3025-W features International Protection Marking code(IP54)-level protection.

appropriate care.
S3025-W is water-resistant to protect it from

Intuitive User Interface

INTUITIVE USER INTERFACE

Intuitive icons on the wide, 12-inch touchscreen of the Tube Head Unit (THU) allow users to easily operate the system. In addition, multiple images can easily be captured after checking the previews.

Dose management *AEC: Auto Exposure Control, **DAP: Dose Area Product, ***PACS: Picture Archiving and Communication System
